	ENVIRONMENTAL / SAFETY POLICY	

The Soligon PCL manages the entire recycling chain dealing with the collection / transport /storage / selection / treatment of the various type of ferrous and non – ferrous metals.

The natural connection of all these activities with the surrounding environment in 2011 led to the implementation of a certified Environmental Management System firstly in accordance with the criteria of the UNI EN ISO 14001:2004 standard and therefore the UNI EN ISO 14001:2015, subsequently integrated with the regulations 333/2011/EU, and 715/2013/EU, which is based on precise and constant commitments aimed at achieving important objectives.

Furthermore, considering that it is important to increase the culture of safety and health in the workplace and to further improve the levels of safety, health and risk prevention in their work, the Management decided to implement within its business management a System of Health and Safety on work Management in compliance with the OHSAS 18001:2007 standard.

Shaping the activity to achieve these objectivities has been and continues to be a daily challenge that sees respect for the environment and the protection of worker's health and safety as the winning tool to improve management and quality of work.

Ensuring observance with the compliance objectives applicable to our company and proper understanding within the company, as well as constantly monitoring updates, is the starting point of our internal policy.

All this trough the support of qualify figures, the training of staff, the dissemination to all the people with whom you come into contact.

The following aspects are no less important:

- Identify and useful action, adopting operational procedures to monitor the influence work in the eco-system to protect and safeguard the environment, prevent soil/water/air pollution and rationalize resources costs at the same time.
- Try to prevent injuries, identifying behavioral procedures and real corrective and preventive actions, with a view to continuous improvement in health/safety and quality of work.
- Treat and give new value to a growing number of waste trough increasingly innovative reuse and recycling techniques and also thanks to effective and safe machines and tools.
- Investing in information, for the continuous involvement of staff and for the development of skills, so as to ensure a high level of professionalism of human resources, both at managerial/administrative and operational level.
- Sensitize and dissimulate the environmental and health and safety culture and increase the sense of the responsibility not only to all staff but also to each individual Supplier/Costumer pursuing the growth, awareness, and sense of responsibility of all employees.
- To meet as for as possible the expectations regarding the environment and health and safety in workplace of all the interested parties, from costumers to employees, to suppliers to the social community.
- Maintain a transparent and collaborative relationship with the public authorities and/or the responsible control bodies.

	ENVIRONMENTAL / SAFETY POLICY	

In the awareness that only with the full and convinced participation of everyone is the achievement of the objectives, the General Manager, coordinating these few but important aspects, is the guarantor of the functioning of an effective Integrated Environment and Safety System that aims at its continuous improvement, remembering that the responsibility of the same involves everyone in the first person, each according to their pertinences and skills, from the General Manager to the individual worker.

This Environment-Safety Policy document is therefore included in the Company Information System, communicated, explained and made available to the staff and kept updated and revised in relation to the objectives that the company intends to pursue.

In order that the commitment signed by the Company is also available to the public, this Environment-Safety Policy document is simultaneously formalized on the Company's Website, for the benefit of all interested parties who intend to view it.
